

Babycat milk

Kittens from birth to 2 months old

Available in 300g
(3 x 100g sachets)

HARMONIOUS GROWTH

For steady, harmonious growth, the composition of Babycat milk is as close as possible to queen's milk, with high energy and protein levels. The kitten's nervous system continues to develop after birth. DHA naturally present in maternal milk helps develop cognitive function, and so Babycat milk is enriched with DHA.

DIGESTIVE HEALTH

It is particularly suitable for the kitten's digestive system, because it does not contain starch, (kittens don't secrete enough amylase to digest starch). Finally, the addition of fructo-oligo-saccharides (FOS) helps maintain a healthy balance of digestive flora.

INSTANT MILK

Thanks to its exclusive formula, Babycat milk dissolves instantly and completely, with no sediment, creating a totally homogeneous formula.
